

TRANS-DISCIPLINARY PROGRAMME

The program is an innovative and comprehensive education aiming at multi-disciplinary to trans-disciplinary options and prepares students for innovative learning. This is also in alignment with the NEP 2020, preparing students for a venture suiting their aptitude and skills, which is also the need of the society.

The program takes a look at the global opportunities available with a non-conventional approach and promotes brain based learning options for the students. The programs integrate knowledge, practical skills and methods from different disciplines and create a trans-disciplinary framework beyond the disciplinary perspectives.

It allows getting hands-on experience and building essential network with fixed hours of supervised local, rural and technical field work training and placements. Students opting for this will get the benefits of flexible study options to chalk a pathway for further innovative learning process.

It will provide a background of Science, Humanities, Social Sciences, Management, and Commerce and make the rural and urban students completely aware of the life in a society in transition
