SYSTEMS MOVEMENT: Autobiographical Retrospectives

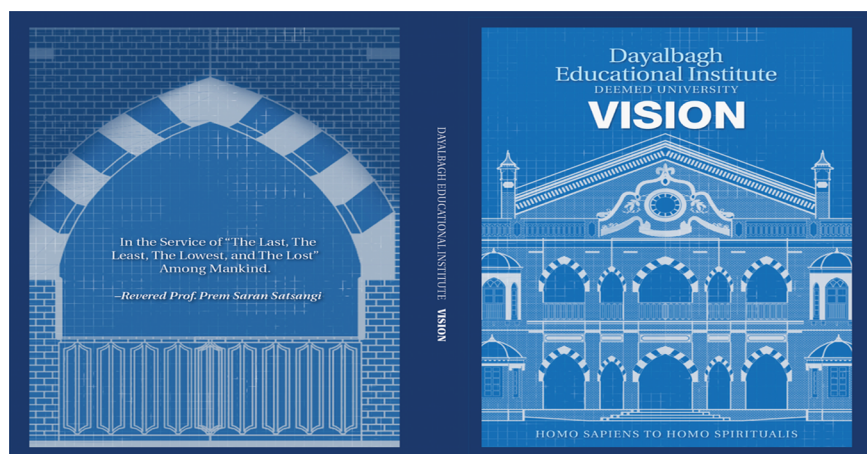

Prem Saran Satsangi

Systems Movement: Autobiographical Retrospectives is a special section of this journal whose purpose is to produce, via invited autobiographical articles, information regarding the thought processes and individual motivations of leading figures in systems movement. This valuable information is normally not included in regular publications, which tend to focus on results rather than the creative process leading to those results. The autobiographical articles are likely to help us to improve our understanding of how, and why, the systems movement has progressed since its emergence in the mid 20th century. Each article in this section is published strictly by an invitation. Invitations are extended to individual authors by the Editor, and are based on the recognition that these authors made major contributions to systems movement.

Our world is trying to tell us something.

We have boundless capacity to study our world. But we need to *understand* its connectivity to develop scalable solutions to global challenges and create a healthier trajectory for everything. We're making it happen.
