

ChemPlatter Talks organized by the Department of Chemistry

(August 1 – 2, 2025)

Students Council of the Department of Chemistry organized ChemPlatter Talks on August 1-2, 2025, which were attended by large number of students and faculty members from different science departments of the Institute. The invited speaker on this occasion was Prof (Dr) Alok Srivastava, Former Chairman, Department of Chemistry and Centre of Advanced Studies, Punjab University, Chandigarh. Organized in the Seminar Hall of DEI, his first talk was on “Energetics: Clean Energy for Green Earth”, in which he highlighted the growing need and significance of green energy in coming years. Through a lucid presentation, he elaborated deeply on different emerging technologies for production and storage of green energy, particularly in India. The second talk by him, organized in the Chemistry Department, was on the topic, “Creativity in Research: Challenge before Young Researchers”. With an interactive and motivating presentation, the learned speaker exhorted audience on the need for innovation and creativity in research and how it can be approached by young researchers to solve problems of the country.
