

Ambrosial Remarks of Gracious Huzur during field work in Punjabi Farm on February 29, 2020 after Diamond Jubilee Memorial Lecture

1. The Scientific Community researching the basis of the physical Universe has created String Theory to explain the physical universe. And they are in the right direction.
2. The Microcosm is completely closed with 21 degrees of freedom / independence. However, the Macrocosm is completely open with infinity to the power of infinity to the power of infinity ad infinitum fineness of sub-atomic particles as referred by Max Planck energy quantas.
3. The age-old wisdom as recounted in Vedas, Upanishads, Kashmiri – Shaivism and Bhagvad Gita deals with the Grand Divisions of Matter and Mind. Thus, in order to describe upto the Grand Divisions of Matter and Mind 14 dimensions are necessary as there are 14 degrees of freedom. Membrane-based String Theory currently talks about 10 dimensions. Therefore, another 4 dimensions are needed to be added in it.
4. In the Religion of Saints, there is the Purely Spiritual Region also that adds another 7 degrees of freedom / independence leading to a total of 21 degrees of freedom / independence. Earlier the scientists were talking about only very few dimensions but are now talking about 10 dimensions. Thus the researches are bringing science closer to the description as available in the eastern traditions and the Religion of Saints.
5. The Government must be clear in its stand with respect to Dayalbagh Educational Institute. If they regard us as a Government funded Institute, we should be given all the privileges of Government funded Institute. We have our MoA & Rules and Bye-Laws, which are well documented and are adhered to rigorously in our operations. All the grants received from the Central Government (Ministry of HRD) as D.E.I. (Deemed University) are audited duly as prescribed and submitted by the Finance Committee as required are sent to

the GOI – MHRD through UGC and duly approved regularly. These are well documented and the account books are meticulously maintained to show the utilization. The Accounts Books show that a substantial part of our funding comes from the Government and the balance that remains is provided by the Charitable Societies. For a paltry sum of Rs 11 lakhs the Government cannot discredit all these facts. However, if the Central Government is in need of the aforesaid money of Rs 11 lakhs our Sponsoring Body (Radhasoami Satsang Sabha registered as a Religious and Charitable Society) will be pleased to donate Rs 11 lakhs.

6. The Advisory Committee on Education (ACE) is a non-statutory body which has been constituted by the joint approval of the Governing Body of D.E.I. (Deemed University) and its Sponsoring Body R.S. Sabha, Dayalbagh, to serve as a Think Tank through Consensus Building Process.
7. Even the newspapers are documenting our self-less social service work. In Dayalbagh the air quality is different. Even at a distance of 1 km from here it is different. Our programme of selfless service in the form of Agriculture is there. Our water quality is regularly monitored and is good. In the area of Renewable energy we are now touching 1 MW generation capacity. Our Values based education system is well appreciated by everyone. The water from STP (Sewage Treatment Plant) is being utilized for irrigation in agriculture. We practice organic farming and we are also growing medicinal plants. We are also promoting innovation in all these areas. With all this good work the Government should actually support us instead of raising such issues.
8. The well-established Science is also now recognizing our view of Cosmology. The Distinguished speaker in the recent DEI Diamond Jubilee Memorial Lecture Dr Spenta R Wadia appreciated our concept of degrees of freedom or independence and mentioned that 10 dimensions are recognized by the String theorists currently. Further extension to 14 degrees of freedom / independence is pioneered by Discourses on Radhasoami Faith with relatively recent

supplement. The Distinguished Speaker of the recent Diamond Jubilee Lecture appreciated the suggestion that the membrane-based string theory concept could be further extended in principle.

9. Bhakti Marg is the best Marg. Gyan Marg leads to ego and the ego leads to downfall. Leaving ego is very difficult. The Living Sant Satguru has communication with the Highest Regions in flashes. Reason may not be given immediately but with time the scientific explanation is given by the Sant Satguru.
10. In Radhasoami Faith we have the process of acclamation. Whatever Gracious Huzur Dr Lal Sahab will say will happen. Huzur Maharaj Sahab had advised that one must always perform meditation with focus on the eyes of the Sant Satguru. The path to the Supreme Grand Divisions of the entire Creational Universe goes through the middle of the eyes of the Sant Satguru of the time.
11. At any given time there can be several Gurmukhs but all do not become Sant Satgurus although they may belong to the Saintly high regions.
